### **Leadership Matters**

Investment in infrastructure leads to returns in private business and housing development. Critical solutions in affordable housing have better outcomes when supported by resources such as access to transportation, utilities, and recreational amenities.

### **Challenge**

1. How do we reach beyond our own neighborhoods to connect with and support a holistic plan for community-wide success?
2. How do we connect with the underserved and vulnerable populations in our community in a way that empowers them to engage in the planning process for the most inclusive civic outcomes?
